

National Agency for Automotive Safety and Victims' Aid

## Corporate Profile

# NASVA Is Your Safe and Secure Partner

Reliable, your kind partner

## Message from Top Management

Since its establishment in 2003, National Agency for Automotive Safety and Victims' Aid (NASVA) has been engaged in business as an agency specializing in "automobile accident measures" with the mission of "To contribute to realize a safe, secure, and comfortable automobile society through the support of accident victims and prevention of automobile accidents."

In Japan, automobiles are the basis of logistics and are indispensable to our daily lives. On the other hand, it is also true that there is a "negative aspect": the occurrence of automobile accidents. Under these circumstances, we believe that NASVA's mission is of great significance to society.

In pursuit of a society free of motor vehicle accidents, NASVA is engaged in accident victim support and prevention of automobile accidents. Everyone in the motorized society has a strong desire to prevent accidents from occurring, and I assume that especially those who have the misfortune to be victims and their families and bereaved relatives feel strongly about this. We will be close to them, listen to their voices, and support them. At the same time, we will prevent automobile accidents themselves so as not to spread the damage, and keep contributing to the realization of a society free from automobile accidents. We are strongly aware the mission above and will continue to work on our business.

In order to realize a society free from automobile accidents, it is best to take steps together with all the members of the automobile society, such as victim groups, commercial transportation companies, automobile manufacturers, automobile users, etc., and work sustainably. I think it is fundamentally essential.

We will continue to make sincere efforts to continue to be your reliable, close partner in society. I would like to ask for your continued understanding and support of our organization and mission.

National Agency for Automotive Safety and Victims' Aid (NASVA)  
President **Koichiro Nakamura**

# NASVA is an agency specializing in "automobile accident measures".

NASVA brings unified implementation of three related activities, to “support” victims of automobile accidents, “prevent” automobile accidents, and “protect” from automobile accidents.

**Name:** National Agency for Automotive Safety and Victims' Aid (NASVA)

**Established:** October 2003

(National Center for Automotive Safety and Victims' Aid: 1973)

**Organization:** Headquarters (Tokyo), Transportation Safety Management Operations Department (Tokyo), Nationwide: 50 branch offices  
**NASVA medical facilities:** 4 NASVA medical centers, 7 NASVA medi-care sections

**Executive and staff:** 353 persons

**Expenses:** 12.2 billion yen (FY2022 budget)

## What is NASVA?

NASVA is the abbreviation for National Agency for Automotive Safety and Victims' Aid.

The background for the symbol mark shows the N from NASVA on a white line.

In addition, the appearance of light spreading from the A and V shows NASVA's wish for a bright future for all people that is full of light and hope.

# Support for Home Nursing Care

Most of those who severely injured their brains and/or spines are cared at home after they leave hospitals. NASVA provides them economic and mental assistance to support their daily care.

## Number of persons with severe disabilities due to automobile accidents

## Benefit for Home Nursing Care

We give the benefits to those who suffer from severe aftereffects of automotive accidents on brains and/or spinal codes and are cared at home. The amount of the payment depends on the severity of the aftereffects and actual cost for the care at home, ranging from ¥36,500 to ¥211,530 per month. The benefits cover the costs of beds, wheelchairs, urine disposers, paper diapers and other disposal goods, and several kinds of service including day-care.

### Beneficiary

(From April 1, 2020)

Beneficiary		Monthly Benefit Amount (Japanese Yen)
Special Type I	Among Type 1, those whose damage on brains or spinal codes are especially sever.	85,310 ~ 211,530
Type I	Those who are injured on brains, spinal codes and/or internal organs, and need twenty-four hour care.	72,990 ~ 166,950
Type II	Those who are injured on brains, spinal codes and/or internal organs, and need occasional care.	36,500 ~ 83,480

# Support for Families Who Lost Breadwinners

## Loan without Interest for Children

Families whose breadwinner are killed or severely injured in automobile accidents often suffer from destitution. NASVA lend money without interest to children of such family on their request; ¥155,000 at the beginning of the loan, ¥20,000 or 10,000 (selective system) per month until the child graduates from junior-high school (usually at fifteen years old), and ¥44,000 when he/she enter school. The borrowers are expected to repay the loan for twenty years.

## Loan without Interest for the Needy

NASVA also provides loan without interest for those who are in poverty because of not receiving the damages. They are classified by three types:

- (1) Persons who have the legal right for damages but hardly recover a part/all of the damages.
- (2) Persons who have not received damages of aftereffects from insurance companies.
- (3) Persons whose damages will be paid by the Japanese government because they were injured in accidents caused by unknown drivers.

## “Tomo-no-Kai” Activities

NASVA has organized a group which consists of child-borrowers and their families in order to promote their welfare. The families can ask advice about problems in a daily life, gain encouragement, and share views and opinions through the group called “Tomo-no-Kai.” The main activities of Tomo-no-Kai are as follows:

## Quarterly Newsletter "Tomo-no-Kai Dayori"

NASVA issues a quarterly newsletter to help the member families exchange information and introduce Tomo-no-Kai activities mentioned below.

## Meetings of the Member Families

Fifty NASVA branch office hold meetings of the Tomo-no-Kai members usually once a year and organize a one-day or an overnight trip. The trips offer children an opportunity to cultivate friendship and urge their guardians to talk over their problems.

## Contest of Paintings, Photos and Calligraphy

In order for member children to cultivate sensibility and imagination, NASVA hosts contests and awards excellent works prize including the Minister of Land, Infrastructure and Transport Prize and the NASVA President Prize.

## Events in Cooperation with Private Companies

Some private companies invite member children to various events in cooperation with NASVA.

Cosmo Oil-sponsored "Cosmo Waku-Waku Safari"

## Guardian Meetings

NASVA hosts guardian meetings in all fifty branch offices, which helps mothers or fathers of child borrowers ask advice mutually and solve their problems in daily lives.

# NASVA Medical Facilities

Treatment uses the most advanced medical equipments    Rehabilitation suitable for patients

One-floor hospital ward system

## Treatment and Nursing Care Based on Advanced Equipments and Attention to Details

NASVA has established and operates four NASVA Medical Centers that specialize in severely disabled persons such as those with persistence of impaired consciousness. These Centers provide hospitalization for persons who have suffered brain injury due to automobile accidents that put them a continuing state of severe impaired consciousness, offering suitable treatment and constant nursing care aimed at the possibility of social rehabilitation. In addition NASVA has made contracts with seven hospitals (NASVA Medi-care Section) offering treatment and nursing care equivalent to the NASVA Treatment and Nursing Care Center in part of their hospital functions.

The hospitalization period at these medical facilities is set at three years or less, with approval for hospitalization based on an integrated determination of the necessity for treatment and nursing care, and the possibilities for recovery, etc.

In these rehabilitation facilities, we respond with adoption of effective treatment and rehabilitation policies suited to each individual, based on the use of advanced medical devices (CT, MRI, PET, etc.).

In addition, we have implemented a one-floor hospital ward system (or monitoring systems in some NASVA Medi-care

Sections) that ensures intensive nursing, in order to enable quick discernment of even the slightest recoveries in the consciousness of hospitalized patients, as well as introduced a primary nursing system where a single nurse has continuous charge of a given patient throughout the hospitalization period. Based on these systems, the treatment and nursing is performed with attention to detail, to provide many natural stimuli in the course of daily living.

Primary nursing care

## List of NASVA Medical Facilities

**NASVA Medical Centers**  
230 beds

**NASVA  
Medi-care Sections**  
80 beds

**= Grand total  
310 beds**

### NASVA Chubu Medical Center

- ◎Open in: July 2001
- ◎Management: Kouseikai Medical Corporation
- ◎Location: 630 Kobicho-shimokobi, Minokamo-shi, Gifu-ken
- ◎Number of beds: 50
- ◎Tel: 0574-24-2233
- ◎URL: <http://ryougo.kizawa-memorial-hospital.jp/>

### NASVA Okayama Medical Center

- ◎Open in: February 1994
- ◎Management: Social Welfare Organization Saiseikai Imperial Gift Foundation Inc., Okayama Saiseikai
- ◎Location: 2-8-35 Nishifurumatsu, Kita-ku, Okayama-shi, Okayama-ken
- ◎Number of beds: 50
- ◎Tel: 086-244-7041
- ◎URL: <http://www.okaryougo.jp/>

### Kanazawa Neurosurgical Hospital

- ◎Open in: January 2019
- ◎Location: 262-2 Gomachi, Nonoichi-shi, Ishikawa-ken
- ◎Number or outsourced beds: 5
- ◎Tel: 076-246-5600
- ◎URL: <http://www.nouge.net/>

### Fujita Health University Hospital

- ◎Open in: January 2018
- ◎Location: 1-98 Dengakugakubo, Kutsukake-cho, Toyooka-shi, Aichi-ken
- ◎Number or outsourced beds: 10
- ◎Tel: 0562-93-2111
- ◎URL: <https://hospital.fujita-hu.ac.jp/>

### Nakamura Memorial Hospital

- ◎Open in: December 2007
- ◎Location: 14-291 Minami Ichijo Nishi, Chuo-ku, Sapporo-shi
- ◎Number of outsourced beds: 12
- ◎Tel: 011-231-8555
- ◎URL: <http://www.nmh.or.jp/>

### Matsuyama Shimin Hospital

- ◎Open in: February 2020
- ◎Location: 2-6-5 Otemachi, Matsuyama, Ehime-ken
- ◎Number or outsourced beds: 5
- ◎Tel: 089-913-0081
- ◎URL: <https://www.matsuyama-shimin-hsp.or.jp/>

### NASVA Tohoku Medical Center

- ◎Open in: August 1989
- ◎Management: General Incorporated Foundation Kounkai
- ◎Location: 4-20-6 Nagamachi Minami, Taihaku-ku, Sendai-shi, Miyagi-ken
- ◎Number of beds: 50
- ◎Tel: 022-247-1171
- ◎URL: <http://www.touhoku-ryougo.com/>

### St. Mary's Hospital

- ◎Open in: December 2007
- ◎Location: 422 Tsubukuhonmachi, Kurume-shi, Fukuoka-ken
- ◎Number of outsourced beds: 20
- ◎Tel: 0942-35-3322
- ◎URL: <http://www.st-mary-med.or.jp/>

### Izumiotsu Municipal Hospital

- ◎Open in: January 2013
- ◎Location: 16-1 Gejo-cho, Izumiotsu-shi, Osaka-fu
- ◎Number of outsourced beds: 16
- ◎Tel: 0725-32-5622
- ◎URL: <http://www.hosp-ozu-osaka.jp/>

### Shonan-East General Hospital

- ◎Open in: May 2016
- ◎Location: 500 Nishikubo, Chigasaki-shi, Kanagawa-ken
- ◎Number of outsourced beds: 12
- ◎Tel: 0467-83-9111
- ◎URL: <https://www.fureai-g.or.jp/toubu/>

### NASVA Chiba Medical Center

- ◎Open in: February 1984
- ◎Management: Seikeikai Medical Corporation
- ◎Location: 3-30-1 Isobe, Mihama-ku, Chiba-shi, Chiba-ken
- ◎Number of beds: 80
- ◎Tel: 043-277-0061
- ◎URL: <http://chiba-ryougo.jp/>

# Ensuring Transport Safety for Automobile Transport Businesses

Automobile transport businesses (buses, taxis, trucks) has the greatest mission to maintain and improve the safety of its operations, because once an accident occurs, the damage and social impact can be extremely large.

For this reason, “aptitude tests”, “training courses”, and “safety management efforts” have become partly mandatory for automobile transport businesses.

NASVA offers universal services at 50 branches all over

Japan, implementing “aptitude tests” targeting drivers, “training courses” targeting vehicle operation managers, and “safety management services” targeting the management level.

Through implementation of these accident prevention operations, NASVA provides a powerful support for safety efforts at transport businesses, and actively promotes accident reduction.

## Training courses for Vehicle Operation Managers, Etc.

Provides courses based on “actual operations or related laws, and management methods required for safety guarantees”, mainly for vehicle operation managers, who are in charge of safety in the transport business using bus, taxi, truck, or other vehicles, and strive to the ensure adoption of transport safety measures.

### Basic Course

Courses helping people who want a basic knowledge of laws and operations required for vehicle operation managers.

### General Course

A course targeting people who have already been assigned as a vehicle operation manager (\*1) or an assistant manager. The objective is to acquire updated knowledge of laws, and operations required for vehicle operations management.

### Special Course

Courses targeting vehicle operation managers whose offices have received administrative sanctions due to serious accidents or violation of laws or ordinances. (\*2) The objective is to prevent recurrence of automobile accidents or violations of laws.

Training courses (Lecture)

Training courses (Small Group Activity with small number of people)

\*1 The automobile transport businesses are required to appoint the vehicle operation manager and file an application with the Ministry of Land, Infrastructure, Transport and Tourism, and strives to ensure safety in daily transport.

\*2 Engages in more practical courses, such as small group activities based on the accident example, and strives to prevent a reoccurrence of the accident or violation.

# For Safe Driver Operation

Persons taking aptitude tests

## Aptitude tests

### Mandatory tests

- Novice Driver tests  
〈For a person newly hired as a driver〉
- Elderly driver test  
〈For drivers aged 65 or over〉
- Specific test I, Specific test II  
〈Persons who have caused traffic accidents resulting in death or serious injury take either Test I or II depending on the frequency of such accidents〉

### Optional tests

- General tests
- General tests with counseling
- Special tests

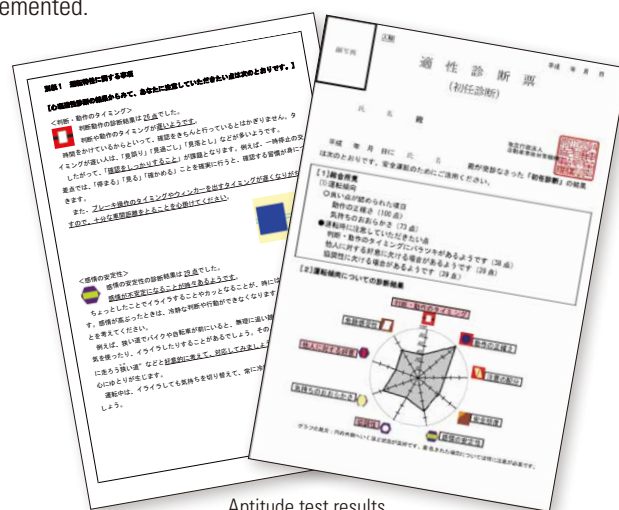

## Implementation of driver aptitude tests and counseling

Aptitude tests, mainly targeting drivers for transport businesses, are used to grasp a person's characteristics in both psychological and physical aspects, in regards to driver personality, safe driving attitudes, and cognition, processing functions, and audiovisual functions, etc., and provide detailed advice and counseling that can contribute to safe driving operation.

In addition, aptitude tests that are mandatory for specified driver classes (Novice drivers, elderly drivers, and drivers who have caused accidents) are implemented.

Counseling after test-taking

Aptitude test results

NASVA is the institution authorized by the Minister of Land, Infrastructure, Transport and Tourism to implement training courses for vehicle operation managers and aptitude tests.

For customers who wish to offer NASVA aptitude tests at their own business offices:

## We rent a dedicated set of equipment (separate fees)

©Aptitude tests can be taken at any time on the computer we rent.  
If you are taking the aptitude tests that require counseling, you would need to have a separate counseling session with the NASVA counselor.

- ▶ The regular testing fees apply.
- ▶ The rented equipment should not be used for any purposes other than taking the aptitude tests.

Note: The photo is for illustration only. The actual equipment may vary.

## Take Advantage of the Test Results for Enhancing Safe Driving Instructions

### Introduction of Our Seminars

Every member of our communities as well as everyone involved in the transportation business want safe driving, and avoid accidents. In order to achieve this goal, NASVA offers opportunities for vehicle operation managers to learn to fully utilize the Diagnostics when giving safe driving instructions to their drivers. We encourage you to take advantage of such opportunities by attending a Seminar on How to Capitalize on Diagnostics.

Theory	How to View the Diagnostics	30 min.
	How to Utilize the Diagnostics	30 min.
Practice	Role Playing	2 hours 30 min.

**Please note:** Seminar attendees need to bring the Diagnostics given to the drivers. Please make sure your drivers have taken the aptitude test before you attend the seminar.

(No need to have your drivers take the tests again if you already have their Diagnostics.)

# Cultivating a Safety Culture

Prevent

## Safety Management Service

All automobile transport businesses have been required to perform “transport safety management”, with everyone from the actual drivers to management level required to keep transport safety in mind as most important, and to ceaselessly strive for improved transport safety.

However, many people may feel “what exactly should I do?” or “I have taken some action, but I am worried whether this is

enough”.

We respond to these questions and support transport businesses with “consulting and lecturer dispatch”, “safety management seminars” in relation to safety management as two main activities.

## We serve safety management consulting to cultivate a safety atmosphere within companies

**To promote the safety management system, We invite governments, related organizations and many transportation companies to hold seminars.**

**Safety management seminar**

## Seminars certified by the Ministry of Land, Infrastructure, Transport and Tourism

Seminars certified by the Ministry of Land, Infrastructure, Transport and Tourism ("Guidelines", "Risk Management (Basic)", "Internal Audit (Basic)") are held.

### Guidelines

For all 14 items of the guidelines\*, we will carefully explain the aim of initiatives to promote the construction and improvement of the overall safety management system and the approach method with specific examples for each item.

### Risk Management (Basic)

For the item "collecting and utilizing information on accidents and near-miss incidents" of the guidelines, we will provide explanations and case studies on the necessity of risk management for preventing accident recurrence and how to collect and utilize information on accidents, etc., with specific examples.

### Internal Audit (Basic)

For the item "internal audit" of the guidelines, we will explain and provide case studies on the knowledge required to carry out internal audits such as the role of internal auditors, audit methods and corrective actions, etc., with specific examples.

### Disaster Prevention Management

- Explanation of Guidelines for Transport Disaster Prevention.
- Workshop for Disaster Risk Assessment.

\* Guidelines regarding the transport safety-management system

## Transport Safety Management Evaluation

The transport safety management evaluation implemented by NASVA is authorized by the Ministry of Land, Infrastructure, Transport and Tourism. To confirm whether the "safety management system" is established and improved by the automobile transport businesses themselves functions as a

system, we conduct interviews with top management and with people in the management divisions, as well as use documentation and records, etc., and then provide advice, etc., for further improvements in transport safety.

### Evaluation Flow

# Promotion of ISO 39001

~ New Road Traffic Safety Management System Based on an International Standard ~

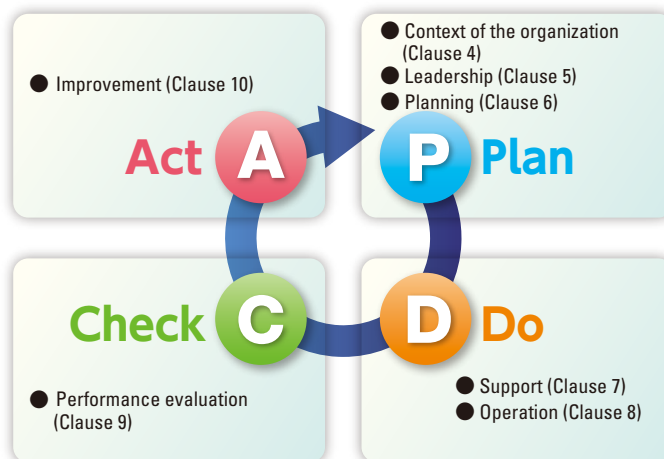

## What is ISO 39001?

ISO 39001 is international standard. Published October 2012, the objective is to reduce deaths and serious injuries due to road traffic accidents.

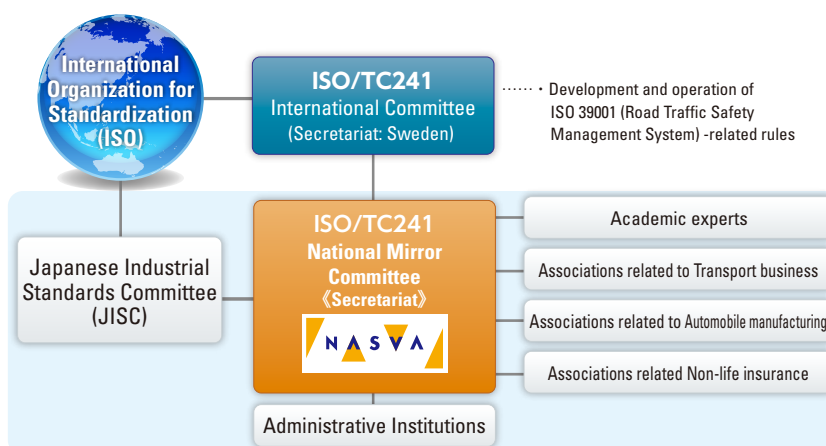

As with ISO 9001 (quality management system) or 14001 (environment management system), this standard stipulates requirements that are necessary for organizations to establish, implement, maintain, and improve a suitable road traffic safety management program in accordance with the PDCA cycle.

\* The chapter numbers in the figure at right refers to the clause numbers in ISO 39001:2012.

## NASVA and ISO 39001

NASVA has organized a National Mirror Committee formed from a wide range of experts involved in road traffic systems in Japan. This committee's role is to expand the implementation of ISO 39001 and to participate in the international committee ISO/TC241.

## ISO Consulting

ISO 39001 certification is issued by certification bodies.

In consulting, we focus on risk assessment deemed to be particularly important in the international standard. We provide advice on the operations including clarification of the road traffic safety-related risk encountered by business, determination of countermeasure, and priority of action items as well as on the methods of continuous improvement of the management system which support these operations.

# For the spread of safer cars and child seats

## Provision of safety information based on car assessments

Safety performance assessments of generally sold cars and child seats are performed as a car assessment project in order to spread safer cars and child seats.

The result of the safety performance assessment of your car and child seat can be known on the website.

**Japan New Car Assessment program**

**Search**

The car assessment is implemented so that a person who drives a car can easily choose a car and so that a car manufacturer can promote the development of safe cars.

## Five Star Award for Vehicle Safety Performance

We comprehensively evaluate collision safety performance and preventive safety performance, and provide information to automobile users as "Vehicle Safety Performance".

The Five Star Best Award will be awarded for the highest score among the highest rated (★★★★★) in the overall evaluation for the year in which the evaluation is conducted, and the Five Star Award will be awarded for the rest.

> Always keep in mind the safety of both car passengers and pedestrians.

## Summary of Evaluation Tests, and Evaluation of Safety Performance

In the Japan New Car Assessment Program (JNCAP), we implement various evaluation tests.

### Technologies to protect people in crashes. (Collision Safety Performance)

Technologies to protect driver, vehicle occupants, and pedestrians in event of an accident, evaluated by a combination of tests duplicating vehicle and barrier impacts and vehicle and human-body impacts.

#### Technology to protect the occupants of a car

Full frontal collision test

Offset frontal collision test

Side collision test

Performance test for electric shock protection

\* Limited to hybrid automobiles and other vehicles.

Performance test for neck injury protection in rear-end collision

Passenger seat belt reminder

#### Technology to protect pedestrians

Pedestrian head protection performance test

Pedestrian leg protection performance test

### New technologies to avoid crashes (Preventive Safety Performance)

An extensive range of preventive safety technologies are evaluated to assist the driver, driver alerts and automatic braking to preclude a collision are examples.

AEBS\* to avoid collisions with a car

AEBS\* to avoid collisions with a pedestrian (at daytime)

AEBS\* to avoid collisions with a pedestrian (at night)

AEBS\* to avoid collisions with a bicycle

Lane departure prevention system

Rear-view monitoring system

Pedal misapplication prevention device

High-performance headlight device

**Important:** Preventive safety technologies that assist the driver are not fail-safe technologies. Although it is unlikely that these technologies will fail under normal use, some conditions and surroundings of vehicle operation may have a counteracting effect on their performance. Carefully read all relevant instruction manuals, always drive safely, and as a further safeguard use good judgement in the deployment of such systems.

> Always keep in mind the safety of both car passengers and pedestrians.

## Technology to prepare for a serious accident (Automatic emergency notifications in serious accidents)

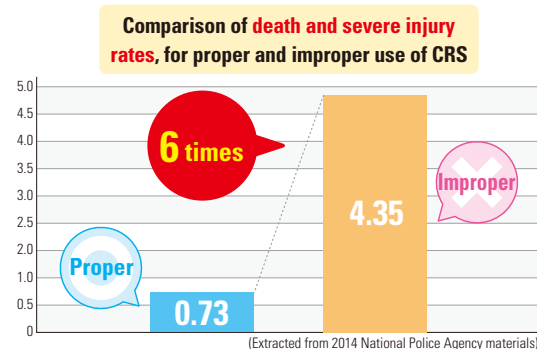

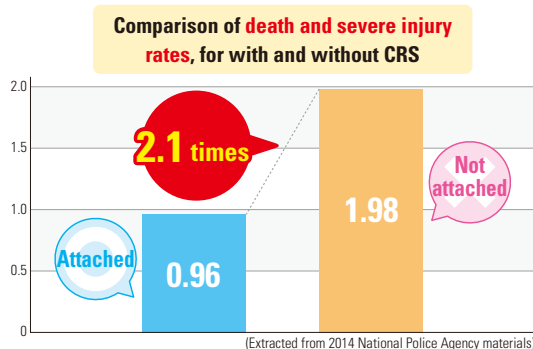

The program evaluates system that provide accident notifications on behalf of the driver or a witness in serious accidents, such as cases involving vehicle airbag deployment.

Flow of automatic emergency notifications in case of an accident

## Child Restraint Systems (CRS) Assessment

We publish reliable safety performance evaluations of CRS available on the market, to foster an environment that facilitates choice of safer products, and promote the development of safer products by manufacturers, to encourage the spread of Safer CRS.

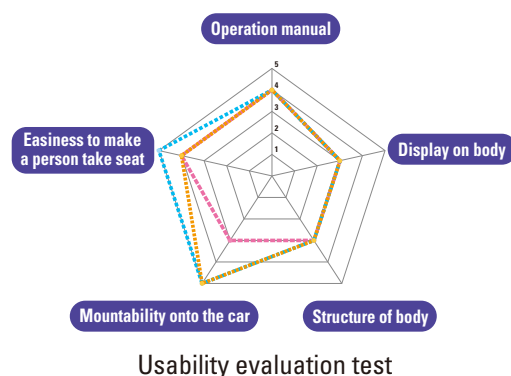

## ISO-FIX Gold Mark

This mark is displayed on ISO-FIX child safety seats that are easy to install and safe, and of which crash test results are all "Superior".

## Safety performance evaluation items for child restraint systems

A frontal collision test and usability evaluation test is performed.
